About Acquist Therapeutics

Acquist is a biopharmaceutical company focused on improving health for patients with inflammatory and metabolic diseases. Acquist's drugs are potent, bispecific, oral drugs, and its lead clinical drug, ACQT1127, is currently in late-stage animal toxicology studies. We target diseases that share a common characteristic: excessive levels of serum uric acid that trigger inflammation and accumulation of fat. The company is developing potentially transformational therapy for patients with gout and NASH -- illnesses that afflict at least 16 million patients in the

U.S./EU and are considered epidemic in East Asia. Further information can be accessed at www.acquistrx.com.
